Baltimore, Maryland January 1, 1951

HONORABLE WILLIAM PRESTON LANE, Jr. Government House Annapolis, Maryland

Dear Governor Lane:

In accordance with Section 24 of Article 77 of the Laws of Maryland, the eighty-fourth "annual report, covering all operations of the State Department of Education and the support, condition, progress, and needs of public education throughout the State" for the school year ending June 1950, is herewith presented to you.

During the year the new compulsory school attendance law became effective. This legislation raised the school-leaving age to sixteen for all pupils except the mentally or physically handicapped who are unable to profit from the existing programs of instruction in the public schools. As a consequence of this law an increased number of Maryland youth will benefit from educational experiences at the high school level. Prior to September 1, 1949 some youths left school to enter employment if they had completed the sixth grade. In this connection I am pleased to call to your attention the excellent work which is carried on under the direction of the supervisors of pupil personnel and the visiting teachers in assisting youths "who are in trouble" or who exhibit emotional difficulties. Many youths of this type formerly made very mediocre progress or left school as soon as the law permitted. At present many of these problem cases are identified in the incipient stages and satisfactory adjustments have been developed for a high percentage of them. A higher per cent of the youth enrolled in our public schools are enjoying the satisfaction of success and happiness.

Since the youth of today will be the citizens of tomorrow, I feel that it is incumbent upon us, the citizens of today, to safeguard our public schools, the vehicle by which American Democracy has been nurtured and made strong.

Respectfully submitted,

THOMAS G. PULLEN, Jr., Secretary-Treasurer

State Board of Education

TASKER G. LOWNDES, President NICHOLAS OREM, Vice-President WENDELL D. ALLEN RICHARD W. CASE JEROME FRAMPTOM, JR. MRS. ALVIN THALHEIMER MRS. CURTIS WALKER

EDUCATION FOR CITIZENSHIP IN A DEMOCRACY

(From an address delivered by the State Superintendent of Schools at the Maryland Educational Conference, April, 1949)

The American Public School system has no counterpart in any other country in the world. Its establishment has its roots in a philosophy of government to which no other nation subscribes in equal measure. It is true that the principles of American democracy are accepted by some nations, but in actuality they do not exist in the same form anywhere else. This point must be understood in order to have a full appreciation of the meaning and the purpose of the public educational system in America.

When it is said that the schools are educating for citizenship in a democracy, the obvious implication is that our children are being inculcated with the moral values and the political principles which we believe to be absolutely essential for the continued functioning of a democratic type of government. It is the task of educators to train a citizenry that has the capacity and the will to preserve and to foster our American democracy.

The American system of government was based upon the theory that government exists for the benefit of all and that its permanence is contingent upon wise and intelligent decisions made only by enlightened, interested, and loyal citizens. It was necessary, therefore, that some program be established whereby people might receive the benefits of enlightenment. Our early leaders could not leave this matter to chance or to some fortuitous arrangement. They had to initiate a system of public education, nation-wide in its application, consistent with the rights of the states, and open to everyone without restriction.

Through the years there has been a gradual but rapid development in the program of public education. It is still imperfect; there are still many thousands of youth in this nation who do not receive the benefits of even a meager education. We have developed, nonetheless, the greatest system of public education in the history of the world. It is but a question of time before its privileges will be extended to every individual, possibly to a degree far beyond the concept of those who were responsible for its institution. There is no alternative if our democracy is to persist, for the public school system has a vital part to play in this respect. It has already more than justified itself. It has proved itself at all times a stabilizing force in our thinking and in our attitudes; it has been a powerful force in the development of our resources; it has been a bulwark in all our struggles. The fact that our nation has become the richest, the most powerful, and the most altruistic of all nations is not a coincidence. Our nation has developed to this extent because our public school system, by freeing the minds of our people, has loosened the whole force of our democracy to the solution of our problems.

If we wish to continue our progress, it is necessary that we raise our sights; it is necessary that we envision a degree of enlightenment far greater than we have had in the past, for as life becomes more complex it demands more understanding, more appreciation of all the forces that impinge upon us.

As educators we must have a thorough understanding and appreciation of all the forces that educate in order that we may discover through psychological and other means the extent to which these various forces operate in the development of any individual—in his physical growth, in his thinking, and in his attitude.

Gestalt psychology is the foundation principle of our philosophy of education. In simple terms this means that we do not educate the different parts of the individual; we educate the whole individual. Although we have compartmentalized education, possibly to an extent that we do violence at times to the integrity of the individual, we must see the scheme as a whole. In the light of this, physical education, for instance, has a much broader concept than the mere development of the individual's health and physical body. It becomes much greater than developing the biceps or certain physical habits. It influences the whole being.

In line with this interpretation of education, the teacher should have a sound philosophy of life and a broad knowledge of the purposes of education. He should have a realization of both the purpose of his particular phase of instruction and the extent and the means by which it contributes to the development of the individual pupil.

The purpose of education, then, is to discover, to catalogue, and to define clearly these influences on our lives, to discover the ways in which they operate, and insofar as possible bend them to a process which will develop the kind of individuals who will exemplify our intellectual, physical, moral, and spiritual values.

Let us now consider what results we are actually realizing with respect to citizenship. Are we developing intelligent citizens? Do our graduates understand the principles of our form of government and possess a real appreciation of democracy as we conceive it? Despite the criticisms, despite the unreasoned and ill-considered remarks of certain people, the youth of our generation have a better realization of what democracy means than those of any other generation in the history of our nation. By comparison, the youth of today have a far greater regard for the rights of all people and a much stronger desire to give everyone equal opportunities, particularly in education. Our youth are practical liberals and they believe in the complete use of our institutions.

Only a generation or so ago there was not universal acceptance of the principle of public education for all. There was a strong feeling that education, particularly high school education, should be restricted to the few. Even today, there are certain older individuals who believe that education beyond high school should be limited to a few; they are unaware of the fact that it is limited and that great numbers of our youth who have the ability are denied the privilege because of forces beyond their control. It should be all too obvious to every thinking person that the safety and the permanence of our nation cannot be maintained unless the brain power of our youth is developed to its capacity.

Every citizen must be self-supporting, insofar as possible. One of the purposes of education is to make it possible for every citizen to have certain skills and abilities that will enable him to make a respectable living. Democracy is not a system of government wherein a small or even a large minority constitutes the breadwinners and the supporters of all. Insofar as it lies within each one, he should be a self-supporting citizen. We should judge our system of education, in a measure, by the extent to which we have developed our youth to take their places in the world as self-supporting citizens.

Furthermore, the graduates of the public schools must be civically intelligent. They must know not only in a theoretical but also in a practical way how our government is operated. They must appreciate and understand forces that play upon their government—the forces that tend to destroy it and the forces that support it. They must understand the processes of representative government and the factors that play a part in the passage of legislation. They must be willing to assume not only the responsibilities of citizenship but also the obligations imposed upon them first as citizens and secondly as recipients of the state's or society's bounty. The development of such qualities of citizenship is one of the most important purposes of public education, for, if government in our democracy is based upon the consent of the governed, everyone has the obligation to participate in the government processes, and the extent of the participation is a reflection, in a measure, upon the quality of the education offered.

We know now that an individual does not "learn" democracy simply by memorizing certain predigested facts of political science. The attitude which a person adopts with respect to the form of government under which he lives is the vital factor. We must ask ourselves what there is in the nature of our system of education that develops certain attitudes within our pupils. It must be remembered that the school is only one agency in the development of attitudes in individuals. Our thinking and our attitudes are the composite of all our experiences. On the other hand, we must recognize the fact that every pupil in our schools comes in contact with his fellows, his teachers, and a system that inherently has in it certain factors that will affect his attitudes. This must give us concern. In the first place, we must be

sure that our teachers have attitudes that are conducive to developing those qualities we desire in our pupils. If we expect the pupils to be affected, as we must, by the personalities of our teachers, we must see to it that the teachers themselves possess those qualities that are desired, for we know that individuals learn both by precept and example, but probably more by the latter. If we expect children to be courteous, we must be courteous to children, if we expect children to be considerate, we must be considerate, if we expect them to be kind, we must be kind: if we expect them to be understanding, we must be understanding. We must see that the situation in our classrooms and everywhere in our school is based upon these criteria. If we expect children to be democratic, we must see that democracy is practiced in the school and classrooms. Conversely, if practices in the school are undesirable, we must expect undesirable traits in our pupils. In other words, the school's influence is far-reaching. for adults are simply more of what they were as children.

All education, all phases of education, must contribute to the good of society as a whole and to the good of the individual. This educational principle applies with equal force to every aspect of our educational program—vocational education, industrial arts, English, history, science, mathematics, the arts, music and the fine arts, as well as our school lunch program, the system of extracurricular activities, the whole atmosphere of the school, and the administration. Finally, we should examine the quality of the instruction in our schools. No teacher should be ignorant of the various types of democratic governments found both in America and the rest of the world. The professional training of teachers should include a study of the social forces which operate to make the attainment of democratic ideals and practices extremely difficult under certain conditions in many countries.

In short, our schools in training the future citizens of a democratic society must not only treat democracy as a philosophical concept of government but must also present it as a militant and successful way of life, fully capable of combating the social evils of unemployment, despair, and poverty anywhere in the world.

The public has expressed great confidence in the public schools by the support it has given them. The people are constantly expressing the desire for increased support and for improvement and expansion. Undoubtedly this is due to the achievements of the schools in the past. If we wish to continue to merit and to receive such support, we must demonstrate constantly that we are achieving the ends for which we teach.

LEGISLATION AFFECTING EDUCATION ENACTED BY THE GENERAL ASSEMBLY OF MARYLAND

Special Session—December 1949

Calvert County-Bond Authorization

Chapter 4, Senate Bill 6, authorizes the County Commissioners of Calvert County to borrow \$300,000 at a rate of interest not to exceed 3% per annum for the purpose of building a new consolidated elementary school for the North Beach—Chesapeake Beach—Randall Cliff area in the Third Election District of Calvert County, altering and remodeling the Fairview Consolidated Elementary School, and expanding the facilities and buildings at Brooks High School in Prince Frederick.

Bond Issues-Exemption from Taxation

Chapter 5, Senate Bill 7, exempts from all State and local taxation the loans and interest payable thereon authorized by Chapter 502 of the Acts of 1949 (General Public School Assistance Loan of 1949) and Chapter 1 of the Acts of 1949, Extraordinary Session (General Public School Construction Loan of 1949).

General Public School Construction Loan of 1949-\$50,000,000

Chapter 1, Senate Bill 1, authorizes the creation of a State debt in the aggregate amount of \$50,000,000, the proceeds thereof to be used to supplement the financing of the construction of public school buildings and public school facilities and the acquisition of such real estate or interest in lands as may be necessary in connection therewith for each of the counties of the State and the Mayor and City Council of Baltimore.

This bill is essentially the same as Senate Bill 442, Chapter 488, passed by the 1949 regular session of the General Assembly. The significant change is the provision which reduces from 15 years to 14 years, from the date of issuance of certificates evidencing the loan, the time allowance for the counties and the City of Baltimore to repay with interest and carrying charges the amount of financial assistance allowed under the provisions of this law.

Maryland School for the Blind-Construction Loan

Chapter 6, House Bill 1 repeals and re-enacts Chapter 683 of the Acts of 1949 creating a State debt of \$350,000 for the purpose of erecting and equipping a new building or buildings for the colored deaf and blind at the Maryland School for the Blind. The changes relate to the provisions for levying of taxes to pay the interest on and principal of said debt.

LEGISLATION AFFECTING EDUCATION ENACTED BY THE GENERAL ASSEMBLY OF MARYLAND

Regular Session—January 1950

CHANGES IN ARTICLE 77

School Attendance—Handicapped Children

Chapter 76, House Bill 26, repeals and re-enacts, with amendments, Section 229 of Article 77 of the Annotated Code of Maryland (1939 Edition) which is the law concerning the education of handicapped children. It changes the law to include mentally as well as physically handicapped children, and increases from \$400 to \$600 the amount which may be paid by the State toward the cost of teachers, special equipment, nursing, therapeutic treatment, and transportation for each handicapped child.

OTHER LEGISLATION

Charles County-Bond Authorization

Chapter 43, Senate Bill 116, authorizes the County Commissioners of Charles County to issue bonds for making additions, alterations and improvements to and for purchasing equipment for the schools of Charles County in an amount not to exceed \$200,000 and bearing interest at a rate not to exceed 4% per annum. All action shall be subject to the approval of a building committee of 5 persons.

Dorchester County-Bond Authorization

Chapter 42, Senate Bill 112, authorizes the County Commissioners of Dorchester County to borrow not in excess of \$3,000,000 at a rate of interest not to exceed 4% per annum for erecting new school buildings, purchasing land for new school buildings, paying architects and other professional fees, altering or repairing existing school buildings and equipping school buildings.

Wicomico County-Bond Authorization

Chapter 35, Senate Bill 96, authorizes the County Commissioners of Wicomico County to borrow \$175,000 at a rate of interest not to exceed 6% per annum for the construction, making additions to or improvements in, the equipment of, and the acquisition of sites for schools at or near Willards, Pittsville, and Salisbury.

Wicomico County-Bond Authorization

Chapter 58, Senate Bill 154, authorizes the County Commissioners of Wicomico County to borrow \$700,000 at an interest rate not to exceed 6% per annum for the construction, completing the construction or aiding in construction, making additions and improvements to and equipping of schools in or near Salisbury.

Bond Authorization

Chapter 109, House Bill 179, authorizes the creation of a State debt of \$3,872,700 which includes \$150,000 for certain improvements at State Teachers Colleges and funds for improvements at various State-aided schools.

Educational Institutions—Tax Exempt Ground

Chapter 27, Senate Bill 64, repeals and re-enacts, with amendments, Section 7 (8) of Article 81 of the Annotated Code of Maryland. It increases the amount of tax exempt ground belonging to nonprofit educational institutions from forty acres to one hundred acres.

Employment of Minors

Chapter 8, Senate Bill 4, amends the Child Labor Laws of Maryland. Among other provisions, it states that no minor under 16 years of age may be employed during school hours, except a minor 14 or 15 years of age who has been found incapable of profiting by further instruction or a minor 14 or 15 years of age who is participating in a school work co-ordination program. It also states that no minor under 16 years of age may be employed for more than 3 hours on any school day, or for more than 23 hours in a week during which school is in session for 5 or more days. When school is not in session no minor under 16 years of age may be employed for more than 40 hours a week. No minor under 16 years of age shall be permitted to work before 7 A. M. or after 7 P. M. No minor of 16 or 17 years of age who is attending day school may be employed more than 6 days in any week or more than 4 hours on a school day, or more than 28 hours during any week containing 5 or more school days. No minor of 16 or 17 years of age who is attending day school shall work before 6 A. M. or after 10 P. M. Employment certificates for any minor under 18 years of age must be made available to supervisors of pupil personnel.

Upon the recommendation of the chief officer of the child's school or the complaint of any officer charged with enforcing this law, or any police officer, supervisor of pupil personnel, or probation officer of juvenile court, the license of any child who becomes delinquent or fails to comply with all legal provisions regarding school attendance may be revoked. Supervisors of pupil personnel are required to make complaints against any persons violating any of the provisions of this law and to prosecute the same. Nothing in this law is to prevent minors of any age from receiving industrial education which has been approved by the State Board of Education or other duly constituted public authority.

The provisions of this law do not apply to employment in farm work or in domestic service in a private home provided such work is done outside of school hours.

General Construction Loan of 1949

Chapter 53, Senate Bill 142, repeals and re-enacts, with amendments, Section 6 of Chapter 277 of the Acts of 1949 and repeals Section 7 of Chapter 277 and enacts a new section to be known as Section 7. It amends in certain particulars the purposes for which the proceeds from the General Construction Loan of 1949 may be expended. It also amends the provisions for the levy of State taxes to meet the interest and principal of said loan, and makes said loan and interest thereon free from State, County and municipal taxation.

General Public School Assistance Loan of 1949

Chapter 52, Senate Bill 141, which repeals and re-enacts, with amendments, Section 6 of Chapter 502 of the Acts of 1949 relates to the levy and collection of taxes to pay the interest on and principal of the General Public School Assistance Loan of 1949. The County Commissioners and the Mayor and City Council of Baltimore are required to levy State taxes for 1950 at one and two-tenths cents (1.2c) on each \$100 of assessable property, for 1951 at one-tenth of one cent (.1c) and for 1952 and all succeeding years until all first installments of certificates issued under the act are redeemed, at five-tenths of one cent (.5c) to meet interest and principal on said certificates.

Payment of Loans—Tax Rate

Chapter 50, Senate Bill 139, provides that one-tenth of one cent (.1c) of the 1951 Maryland State tax rate on real property shall be for payment of principal and interest on the General Public School Assistance Loan of 1949, and three-hundredths of a cent (.03c) shall be for payment of principal and interest on the Maryland School for the Blind Loan of 1949.

NOTES FROM THE MINUTES OF THE STATE BOARD OF EDUCATION August 30, 1949

Dr. Pullen called the attention of the Board to the fact that every public employee is required to sign a loyalty pledge and that signed copies of the oaths of the employees for whom he is responsible are on file in the proper office.

Dr. Pullen also stated that, in accordance with the authorization of the State Board of Education, arrangements have been made to carry out the provisions of the legislative act relating to the educational training of war orphans. Dr. R. Floyd Cromwell and Mr. Brian M. Benson have been designated to be in charge of this program.

Three new supervisory appointments were made: Mr. George Pratt, School Lunch Program, effective September 1, 1949; Miss Evelyn Miller, Home Economics, effective November 1 (or earlier); and Mr. Dwight Jacobus, Industrial Education (Apprentice Training), effective November 1, 1949 (or earlier). The following changes in assignments also were made: Dr. Wilbur Devilbiss, changed from Supervisor of High Schools to Supervisor of Teacher and Higher Education; Dr. R. Floyd Cromwell, changed from Supervisor of Vocational and Education Guidance to Supervisor of High Schools; and Mr. Richard McKay changed from Field Supervisor to Assistant Supervisor of Accreditation.

The State Superintendent presented a written report of the Maryland public school building construction program in the State, from January 1, 1947 to July 1, 1950. The total cost, including that of the Baltimore City program, during the period indicated, will be \$100,905,588.84.

Dr. Pullen stated that the standards for public school buildings which had been adopted some years ago are being revised by a committee of superintendents and building experts. He requested authority to make variations from the present standards, pending final revision. The Board unanimously passed the following resolution:

RESOLVED: In view of the fact that the "Standards for Maryland School Buildings" has not been revised since 1941, and

In view of the fact that recommendations from architects and builders indicate more economical and functional construction is possible, and

In view of the fact that a committee of architects, builders, engineers, and county superintendents is considering recommendations for revisions of "Standards for Maryland School Buildings,"

The State Board of Education hereby authorizes the State Superintendent of Schools to make such exceptions to the "Standards for Maryland School Buildings," Revised 1941, as he deems wise, pending such time as the recommendations for revision are approved.

November 18, 1949

The Board welcomed Mr. Richard W. Case, its newly-appointed member.

The Board passed a resolution of regret on the death of a former member, Captain Robert E. Vining.

Dr. Pullen reported that he had been appointed a member of the Accrediting Committee of the American Association of Colleges for Teacher Education.

The State Superintendent then presented to the Board a summary of the Maryland State public school budget as it has been submitted to the Budget Director. The summary was accompanied by a written explanation of certain items, and Dr. Pullen reviewed briefly the principal changes and the reasons for them.

Dr. Pullen announced that the Board of Public Works had approved applications for financial assistance from State funds for school building construction as follows:

General Public School Assistance Loan (State Grant) \$12,855,435.50;

General Public School Construction Loan (State Loan) \$17,789,368.95.

The Board of Public Works also approved the floating of sufficient bonds to take care of school building needs as scheduled.

A new school building code which had been tentatively approved by the superintendents was adopted tentatively by the Board, pending further study. The code was drawn up by representatives of the State Department of Education, the county superintendents, the architects, the contractors, and a representative of the State Engineer's office.

Dr. Pullen informed the State Board that he had appeared before the Legislative Council to discuss the problem of selecting local school board members. He, other school officials, and Parent-Teacher organizations, in opposing all local bills introduced into the Legislature on this subject, have advocated uniformity in the selection of all school board members and have held that local exceptions would disturb the general principle.

At Dr. Pullen's request, the Legislative Council appointed a committee to consider the subject. At a meeting held in the Board room of the State Department of Education on Wednesday, November 9, 1949, the Committee showed no sentiment in favor of the election of Board members, but expressed some interest in having the names of possible appointees screened before they were presented to the Governor. Dr. Pullen took the position that while the State Board would screen the names of persons suggested by county residents, the Board and he would prefer not to do so. The Committee has made no recommendation but is continuing its study.

Dr. Pullen informed the Board that the Board of Public Works has adopted a regulation to the effect that State institutions and departments, in addition to informing the State Treasurer relative to

fire damages, must notify the Department of Public Improvements within twenty-four hours of any fire loss. A representative of that Department, with insurance company agents, will determine the scope of loss and initiate investigation. The Department of Public Improvements will then ask for bids for replacements. The Board of Public Works has decided, further, that service contracts (not to be confused with repairs) are to be handled directly by State institutions and departments without referral to the Board of Public Works or the Department of Public Improvements. Repairs will continue to be handled through the Department of Public Improvements. Dr. Pullen said that copies of these directives had been sent to the State Teachers Colleges.

The Board approved Section V of the Regulations for the Approval of Nonacademic Schools in the following revised form:

V. Policies, Business Practices, and Ethics

- A. Persons shall not be listed or advertised as members of the faculty of the school unless they are regularly employed to teach one or more of the regular subjects in the curriculum.
- B. If persons employed as lecturers or demonstrators are mentioned in bulletins or advertising letters, such persons shall be designated as lecturers or demonstrators; and if a course prepared by a well-known individual is offered by someone other than the person himself, it shall be clearly indicated that the course is given by a regularly-employed member of the staff.
- C. No officer or employee of any school shall knowingly solicit any student to leave an educational institution at which he is in attendance; nor shall an officer or employee of the school seek to induce any student to change his plans when such student has definitely enrolled in another school.
- D. The school shall refrain from exaggeration or misrepresentation of any kind in its advertising through its field representative or through any other agency.
- E. Sales representatives of schools should be selected primarily on the basis of ability and integrity and each representative should be given an adequate preliminary training. The school shall be responsible for any statements or commitments made by its representatives.
- F. The school may advertise that it is endorsed by manufacturers, business firms, organizations, or individuals engaged in the line of work for which it trains only if it can present written evidence of the endorsement or endorsements.
- G. The school shall not use "blind" advertisements to solicit prospective students, nor shall it advertise in the "help wanted" or other employment columns in newspapers or other publications. All advertising shall be done in the name under which the school has been approved by the State Department of Education.
- H. The school shall not allow a student or prospective student a premium or other special financial inducement for registration.
- I. No school shall offer financial aid and scholarships to students except upon the following basis:
 - 1. Bona fide loans may be granted to worthy and needy students.
 - Financial aid (so-called "work" or "service" scholarships) may be granted provided the duties performed are bona fide and the remuneration paid is not in excess of current local rates for comparable services.

- 3. Funded scholarships, from sources other than the current operating budget of the school, may be granted upon the following conditions:

 a. The value, number, and source of such scholarships shall be printed in the school catalog.
 - b. They shall be applied for in writing by scholarship candidates and awarded by the head of the business school (or an executive committee thereof) on a truly competitive or merit basis.
- 4. Scholarships shall not be used as a subterfuge to secure enrollments.
- J. The school shall not misrepresent employment opportunities either orally or in writing and shall not directly or by implication guarantee positions. The school may mention the number of positions and the specific positions in which graduates of the school have been placed. The school shall take no credit for placements made through licensed employment agencies.
- K. The school shall not misrepresent probable earnings in the field for which it trains nor shall it feature top salaries earned by a few workers in the particular field. The school shall not advertise average wages per hour in excess of the average wage that graduates of their own school or similar schools have earned during the first year of employment.
- L. No fees shall be accepted for placing any student or graduate.

The Board approved a change in one paragraph of the requirements for nonpublic tutoring schools. The paragraph was changed to read:

Any type of certificate given must be approved by the State Superintendent.

This amendment had been submitted to the tutoring schools, and they had registered no objection.

Dr. Pullen brought to the attention of the Board a resolution of the Board of School Commissioners of Baltimore City, expressing the intention of the Board to discontinue Coppin Teachers College at the end of the current school year and requesting the State to assume the responsibility of providing for the education of colored teachers for Baltimore City. A letter stating this resolution had been sent to the Governor as well as to the State Board of Education. The Governor replied that he was referring the letter to the President of the State Board of Education and the State Superintendent for advice. These two officials advised the Governor that a study would be made but that there should be no difficulty in absorbing the students from the Coppin Teachers College.

February 28, 1950

The Board adopted a resolution expressing its sorrow at the death of Mr. Thomas Haven Chambers, a member of the State Board of Education from 1920 to 1938.

At the request of the State Superintendent, the Board rescinded the following resolution, which was passed on February 16, 1934:

RESOLVED: That any Maryland institution which wishes the approval of the State Board of Education as a standard college and/or authority to issue the Bachelor of Arts or Bachelor of Science degree, must first qualify for approval by the Association of Colleges and Secondary Schools of the Middle States.

This resolution is not operable in view of the fact that the 1947 law forbids any educational institution, with certain exceptions, to operate in Maryland until it is approved by the State Superintendent. The Middle States Association does not approve a college until it has graduated one or two classes, and the foregoing resolution prevents the State Superintendent from allowing a new college to open its doors.

Dr. David W. Zimmerman was appointed Assistant Superintendent in Finance and Research, effective March 1, 1950. The board accepted the resignation of Mrs. Marie Wheatley Meier, Supervisor of Special Education, effective December 31, 1949.

The Board tentatively approved revisions of By-law 70 which fixes the ratio of students per teacher in the State high schools.

The Board approved the kindergarten-primary course which is now being offered at the State Teachers College at Towson.

The State Superintendent reported that the students at the State Teachers College at Towson have requested permission to bring a foreign exchange student to the College. The students will be responsible for the expenses involved. The Board granted the request, provided the Attorney General sees no objection to the procedure.

The State Superintendent informed the Board that the American Association of Colleges for Teacher Education had recently accredited the State Teachers College at Bowie. All four of the State Teachers Colleges are now accredited.

June 8, 1950

The State Superintendent reported that he had ordered a resurvey of all educational nonpublic institutions approved by him. A consolidated report of the resurvey will later be sent to members of the State Board.

The Board passed a resolution with the following provisions:

(a) No person, firm, association, or corporation (other than a bona fide church organization) shall use the name "school," "institute," "college," "university," or word of like import, in such manner as to connote the offering of a program of college, professional, preparatory, high school, junior high school, elementary, kindergarten, nursery school work, or any combination thereof, or a program of trade or technical education, or both, in the fields of trade or industry, unless such person, firm, association or corporation shall have first obtained a certificate of approval from the State Superintendent of Schools in the manner provided by Section 14A of Article 77 of the Annotated Code of Maryland (1947 Supplement).
(b) This regulation shall not apply to any person firm, association or

(b) This regulation shall not apply to any person, firm, association or corporation using any name specified in sub-section (a) hereof, at the time of the adoption of the Regulation, nor to any corporation operating a school or college under a charter granted by the Legislature of Mary-

land.

The Board passed the following by-law:

By-Law 73: In view of the shortage of qualified elementary school teachers, during the school years 1950-53 Junior High School Teachers' Certificates shall be valid for teaching in the elementary schools. Teachers holding such certificates who continue to teach in the elementary grades shall qualify for Bachelor of Science Certificates in Elementary Education within six years of the dates of appointment.

The Board revised By-law 67 to read as follows:

Certificates for librarians in the county libraries shall be issued under the following titles:

County Library Administrator County Librarian of Special Services County Branch Librarian Library Assistant

Any of these certificates, valid for three years in a Maryland county library, may be issued to a graduate of a college which has been approved for the training of librarians by the American Library Association or by the Maryland State Board of Education, provided such applicant has completed a full year or thirty semester hours of work in Library Science, provided the applicant passes the special medical examination, and provided the applicant has been tentatively appointed to a position for which the particular certificate is required.

These certificates may be renewed for four years, then for six-year periods, upon evidence of successful experience and professional spirit.

The Board authorized the State Superintendent to issue War Emergency Certificates for the year 1950-51 to applicants who do not qualify for regular certificates and who are needed to fill teaching positions in public schools, pending the availability of qualified applicants.

Changes in the State Plan for Vocational Education were adopted to allow for the replacement of an auditor by a State Supervisor and the possible addition of other supervisors.

Dr. Pullen reported that upon the advice of the Attorney-General, By-law 70 be rescinded in the form in which it existed prior to the revisions approved by the State Board on February 28, 1950. The By-law fixes the ratio of students per teacher in the State high schools. The Board approved this action.

The Board approved the following changes in positions, effective July 1, 1950: Miss Geneva Ely, changed from Assistant Supervisor-Editor of Publications to Supervisor of Special Education, and Miss Dorothy Shires, promoted from Assistant Supervisor to Supervisor of Elementary Schools. Mr. George Myers was appointed Assistant Supervisor of School Lunch Program, effective July 1, 1950.

The Board accepted the resignation of Mr. George T. Pratt. Supervisor of School Lunch Program, effective June 30, 1950, and of Mr. Austin Gisriel, Assistant Supervisor of Related Instruction, effective July 20, 1950. Mr. Pratt resigned to become principal of the Clark School for the Deaf in Massachusetts and Mr. Gisriel to enter other work.

Upon the recommendation of Dr. Pullen, the Board authorized a survey of the needs in Maryland in the field of education for handicapped children. The study will consider not only the program which should be offered by the public schools but also the other educational facilities available in the State. The Board authorized the employment of such outside experts as may be necessary to assist and the payment for such services out of the funds provided in the budget.

The Board approved Dr. Pullen's recommendations relative to Coppin Teachers College as follows:

- 1. That the State Board of Education, recognizing the fact that there is need for between fifty and sixty-five colored elementary teachers annually in the Baltimore area, recommend to the Governor and to the General Assembly of Maryland that the State Board of Education continue the training of elementary teachers in Baltimore City, and that sufficient funds be appropriated for the State Board to acquire the necessary physical facilities for the operation of a college of approximately three hundred students, that tentatively the State Board take the position that this school be a day school without dormitory facilities, and that the college be open to all qualified colored students within commuting distance. Further, that the State Superintendent of Schools and his staff be directed to continue to study the situation further with such advice as may be desired, and report to the Board later as to the specific proposals for the implementation of this recommendation. Incidentally, attention should be called to the fact that regardless of the arrangements made additional building must be provided.
- 2. That in view of the fact that the continuation of the institution is recommended by the State Board, the State Superintendent be authorized to admit a limited number of freshmen to Coppin in September 1950, the limitation to be determined by the adequacy of the physical facilities of the institution, the fact being recognized by the State Board that there has been a limit of fifty entering students each year at Coppin in the past.
- 3. That the State Superintendent be empowered to complete arrangements for the operation of the College for the three classes presently enrolled at Coppin, and that these arrangements consist in selecting the faculty, preparing the budget, and securing the necessary funds from the Governor for the operation—it being understood that the physical and other arrangements pertaining to the operation of the institution will be consistent with the policies in the other teacher training institutions of the State, provided, however, that special exceptions, because of the exigencies of the situation, may be made upon approval of the Board.
- 4. That in "taking over" the faculty the State Superintendent be authorized to deviate from the salary schedule for colleges as may be necessary in order not to decrease any salary now paid to any instructor or official, and further that he be authorized to designate such titles as he may in his judgment deem advisable for the officials of the College.

DIVISION OF INSTRUCTION

In the summers of 1945, 1946, and 1947, the State Department of Education had, through joint planning with county school administrators, operated curriculum workshops at Towson State Teachers College. By means of this arrangement, the Department had given impetus and direction to a State-wide revision of the curriculum necessitated by the development of a twelve-grade system in all the counties of the State.

In the summers of 1948 and 1949, many of the counties operated their own workshops to make possible participation by a maximum number of teachers and to determine from local conditions and needs the kinds of activities and data which should constitute the various courses and educational projects. In these years the State Department began, more and more, to shape its services and resources to harmonize with local developments. The Department's major contributions, in the year 1949-1950, to the implementation and co-ordination of local and county programs may be summarized under the following heads: (a) extension and refinement of the arts program; (b) development and distribution of essential resources; (c) strengthening and adapting the program of teacher education, both pre- and in-service, to conform with changes in the public school program; (d) extension and improvement of the program of evaluation.

The Arts Program

Extension and refinement of the arts program. The child study program, now in its fifth year of operation in the State as the major element in the program of in-service teacher education, had convincingly demonstrated that what the child needs to learn most urgently is determined by his own growth needs—by the demands made upon him by his own organism as it matures and develops and by his own culture. These demands, both personal and social in their nature, comprehend all the arts—the language arts, the fine arts, the social and physical arts, and the practical or technical arts. As an expression of his own nature and of the patterns of life in his community, the child has to learn to walk; to run; to climb; to swim; to play games; to talk; to sing; to read; to write; to compute; to dance; to draw; to build swings and playing fields and bird houses perhaps; to maintain the rhythm of rest and motion, food taking and digestion, sleeping and waking; to effect satisfactory associations with the opposite sex; to adjust and, in some measure, control the mechanisms of today's world; to come to an understanding of his complicated and complex society; to belong to his peer groups and, with increasing success, to the adult community; to espouse values that will stand him and his society in good stead; and to come to grips with the process of growing older, of aging happily. In the acts of living, the arts are united.

In deference to this truth, the Division of Instruction explored, in this year 1949-1950, the possibility of projecting the principles

and premises of the child study program to include the language arts and the fine arts. Dr. Emmett Betts and Mrs. Marjorie Johnson of the Reading Clinic of Temple University spent one day with the Division reviewing the approaches and concepts so closely identified with child study and probing their implications for language arts as a part of teacher education. These discussions were in anticipation of the time when the in-service teacher education program in the language arts might be made an integral and operating part of the child study program.

In the feld of music, the Division explored this possibility even more vigorously and more fully. Dr. James L. Mursell of Teachers College, Columbia University, was employed as consultant to help in a study of the music program now in effect in county schools and to make recommendations for its improvement. Dr. Mursell visited music classes in twelve of the twenty-three counties and there observed programs which were representative of the total range of practices in the State. The major emphases in Dr. Mursell's report were placed upon the recommendations that (1) a complete program of music in the schools involves fve major types of activities, to wit, singing, playing, bodily movement, listening, and creating; (2) introduction of performance on the standard instruments is desirable and feasible in the intermediate grades. Specifically, this means class instruction in instruments of the woodwind, string, and brass families, and also in piano. Such classwork should be on an opportunity basis; (3) the program in the junior high school should be that of a continuing general program, with emerging specialities grouped around it; (4) the same type of program is appropriate for the senior high school; (5) the classroom teacher must have the guidance of the music specialist to clarify and define purposes, to make available materials and devices, to carry on workshop activities, and to provide opportunities for personal musical development.

A key to Dr. Mursell's thinking is found in the following paragraph excerpted from his report: "All these special activities, however, should come to a focus in the work in general music. The controlling conception of general music should be the promotion of music as a significant area of human culture, this being brought about by many-sided activities and experiences, and enriched by contact with whatever musical specialities may be carried on in the school. The primary aim, that is to say, should be cultural and social rather than technical, for it may be confidently expected that children who join the various specialized performing organizations on a basis of enthusiasm and interest will develop the requisite techniques readily enough, this being particularly true of the techniques involving the notation."

Plans were immediately made in the Division to follow through on these recommendations, first, by seeing that they were presented and their implications made clear in supervisory and other conferences and, second, by projecting a series of State and regional workshops devoted to increasing the "know-how" of supervisors and teachers in the music area.

A beginning was made also in the building of the program of physical arts in this same way. Dr. Thomas C. Ferguson, Supervisor of Health, Physical Education and Recreation in the Department, in co-operation with the professional staff in Allegany county, sought to effect pilot practices which would define a direction for other counties in the State. First, specialists employed to serve as consultants elaborated the significance of the premises and principles of child study for the total general education program. Committees were then organized which were representative not only of the various sections of the county but also of service agencies other than education and of interested citizens as well as of teachers and supervisors. These committees attempted to identify all the elements in a fully effective program of health, physical education and recreation, to determine the elements already present, and to project plans for overcoming deficiencies.

The Division of Instruction plans to approach in the same way the development of the fine and practical arts in a general education program for all pupils.

Essential Resources

b. Development and distribution of essential resources. During the year, 1949-1950, the Department spent \$4,194.40 for the purchase of audio-visual materials, their cataloguing and servicing. In June, 1950, there were on hand in the Library Extension Division 91 films, 66 film strips, and 46 recordings. Forty-six films were on order following careful previewing. In addition, the Department had had made 100 slides on fall gardening from a second-grade project at Glen Burnie, 27 slides on nutrition from a second-grade project at Pumphrey, and 57 slides on healthful living from a third-fourth grade project at Bowie.

The Supervisor of Curriculum of the State Department of Education reported that during the year and a half that the State Film Library had been in existence 1,302 showings of the films had been scheduled. Films most in demand were those on "Human Growth" and the Teachers College films. The county boards of education and the senior high schools, more than other groups, have scheduled films for showings.

Because of the need for materials on Maryland, each county is engaged in a one-year program to take and develop 24 black and white pictures, 8"x10", of types of living in that particular county, each picture to be accompanied by a written explanation. The pictures are to represent the six areas of history, geography, industry and occupations, scenic, social, and unique. Materials such as films and flashbulbs were purchased by the Department and sent to the counties.

A resource bulletin depicting life in the local community is being developed in each of the counties. In each instance, the bulletin

contains pictures, graphs, and charts. It is written on the level of junior high school pupils. The information relates to the people living in the county—who they are, where they live, how they make a living, and what health facilities they enjoy. The project of developing the bulletin is to be a co-operative one worked out by supervisors, teachers, pupils, and people in the community. These participants, of course, need training in how to do research, how to write, and how to check for accuracy. To meet this need, the Division of Instruction secured the services of Dr. Rudolph Flesch and Mrs. Amy Cowing, both specialists in the feld of "readable writing," to work with the county personnel who are responsible for producing the county resource bulletin and for assuring that it is intelligible to junior high school pupils.

Besides these specialists and county and State personnel who are available for continuing service, there are in our specialized institutions and agencies in the State, in our teacher education colleges, and in our local communities potentially valuable personnel and material resources which should be identified and plans made for their systematic use in the development of appropriate courses and projects. In this program of carefully planned identification of resources and their consistent use in the program, the State Teachers Colleges are placed strategically to operate as mobilization centers. In the furtherance of this conception, the Department invested approximately \$700 in materials for these centers designed to demonstrate the kinds of essential resources which must be available at the Colleges when they play their parts completely in the on-going program of teacher education.

Teacher Education Program

c. Strengthening and adapting the program of teacher education, both pre- and in-service, in conformity with changes in the public school program. In November, 1949, Dr. H. L. Caswell of Columbia University visited Towson and Bowie State Teachers Colleges, consulted with members of the staffs of the Colleges and of the State Department of Education, and made suggestions for further developing and strengthening the program of teacher education in these institutions. His suggestions included (1) a closer interrelationship between the professional and liberal arts offerings in the Colleges; (2) closer functional interrelationships among the professional offerings; (3) use of the campus school for laboratory experiences and child study; (4) provision of working relationships with children in every year of the program; (5) use of teachers colleges as centers for the mobilization of personnel and material resources; (6) an inventory of the economic and educational status of youth in the community in anticipation of an economic recession.

In October, 1949, Dr. Harold F. Clark of Columbia University and Dr. Howard Anderson of the U. S. Office of Education visited Bowie State Teachers College for the purpose of considering the relationships of offerings to the conditions of living of those taught

by the graduates of this school. The gist of the combined judgment of these two specialists is given in the following statement: "The teacher education program in all its aspects, including the academic and professional programs and also the program of the demonstration school and affiliated practice centers, should take its orientation from and be conditioned by the quality of living which obtains in those areas served by the teacher graduates of the college. Some prerequisites for the achievement of such a program are, (1) specific knowledge of the conditions which now obtain in the community; (2) specific knowledge of the resources available for the improvement of these conditions; and (3) the understandings, skills, and procedures which teachers must have for relating these resources to needs. Bowie enjoys unusual opportunities for meeting these prerequisites in its teacher education program."

During the week, January 16 to 20, 1950, the elementary and high school supervisors of the State met at State Teachers College, Towson, to consider the competencies the teacher should bring to the teaching job and the competencies supervisors should help teachers develop. Seven discussion groups were organized at the conference, each of which concerned itself with the role of the supervisor, the responsibilities of the supervisor, the problems of the supervisor, and recommendations. College staff members and county supervisory groups shared judgments and experiences and contributed to the clarification of their respective responsibilities in the development of fully competent teachers.

As in the preceding four years, the child study program continued to be the most important phase of the in-service teacher education program. On September 15 and 16, 1949, Dr. Daniel A. Prescott, Director of the Institute for Child Study, University of Maryland, appeared before the county Superintendents of Maryland in the board room of the State Department of Education and summarized the child study program to date. In his presentation, Dr. Prescott stressed certain basic concepts: (1) children need help in meeting developmental tasks; (2) the teacher operates on the basis of information about each child; (3) the teacher needs integration of knowledge from many sciences in order to understand the behavior of children; and (4) the teacher needs to develop skill in group dynamics.

The child study program in Maryland was initiated in 1945. In 1945-1946, there were 253 colored and 1,047 white participants. In 1946-1947, there were 609 colored and 1,742 white participants. In 1947-1948, there were 867 colored and 2,980 white participants. In 1948-1949, there were two kinds of participation: (a) there were 559 colored and 2,326 white teachers who continued participation, and (b) those who had finished three years of participation worked on implications for the curriculum. In 1949-1950, 600 colored and white teachers participated in the first-year program; 516 colored and white teachers in the second-year program; and 803 colored and white teachers in the third-year program. A total of 1,919 colored

and white teachers participated in the child study program for this current year, 1949-1950.

In the years ahead the implications of the child study program must be explored more fully and sensed more keenly. Dr. Prescott in his presentation to the superintendents suggested that (1) changes should be made in the elementary school program, for it is heavily loaded with social studies for which the children are not yet ready. Children on this level are more interested in the world about them, i.e., in physical science; (2) changes should be made in the secondary school for it is heavily loaded with mathematics and science, while the pupils are particularly interested in vocations and matters dealing with social relationships; (3) the procedures used in physical education should be changed to prevent rigid adult control and to allow more free activity on the part of the pupil participants; (4) we should not stigmatize the pupil who cannot learn something at a specific time. We should so place and time various experiences that each pupil will realize the objectives which society has set.

Recognition should be given also to a growing interest in a child study program for parents. This interest should undoubtedly be exploited and plans made to establish parent-child study classes as a major element in the program of adult education.

Evaluation Program

d. Extension and improvement of the program of evaluation. This year, the Department, with the aid of representative personnel from the counties, revised the State testing program. The minimum program arrived at after considerable study and exploration of all the possibilities consists of the following tests and schedules:

Grade	Date to be given	Name of test	Publisher
1	September—second	· Lee-Clark Reading Readi-	California Test Bureau
3	week of school January or February	ness Test Progressive Achievement Tests, Primary Battery,	California Test Bureau
3	November	Form A New California Short- Form Test of Mental Maturity, Primary '47 S-Form	California Test Bureau
6	January or February	Progressive Achievement Tests, Elementary Bat- tery, Form A	California Test Bureau
6	November	New California Short Form Test of Mental Maturity, Elementary '47 S-Form	California Test Bureau
9	First Quarter	Progressive Achievement Tests, Intermediate Bat- tery, Form A	California Test Bureau
9	First Quarter	New California Short Form Test of Mental Maturity, Intermediate '47 S-Form	California Test Bureau

9	Last Quarter	Kuder Preference Record	Science Research Associates
11	First Quarter	Progressive Achievement Tests, Advanced Battery, Form A	California Test Bureau
11	First Quarter	New California Short Form Test of Mental Maturity, Advanced '47 S-Form	California Test Bureau
11	Last Quarter	Kuder Preference Record	Science Research Associates
12	Last Quarter	General Education Development Tests	Cooperative Test Division of the Educational Testing Service

The testing program provides school people with objective bases for curriculum planning. These include data or individual differences in interest, ability, and aptitude, which serve as bases for guidance programs and for a variety of adaptations which should be made within the program to meet individual needs. The program is not, and cannot be the means of promoting standardization, uniformity, or odious comparison.

Since it relates to the more tangible outcomes of education which lend themselves to objective measurement, it is only one part of the program of evaluation. Still more comprehensive are the ways and means employed to evaluate less tangible outcomes—attitudes, dispositions, habits of thinking, and behavior patterns. In recognition of this truth, the Department in 1948-1949 and 1949-1590 prosecuted a program designed to develop a broad evaluative instrument. The spring conferences of 1949 and 1950 were devoted to this objective. The values which should be derived from public education, identified in the conference of 1949, were, in 1950, made into the form of an evaluative scale and extended to include administrative and instructional aspects of the program. It remains now further to refine this instrument until it becomes maximally useful in the study of elementary and secondary education in the State.

TEACHER AND HIGHER EDUCATION

To discharge the responsibility imposed upon the State Department by the enactment of Section 14A, Chapter 489, of the 1947 Public School Laws of Maryland, which required nonpublic schools—including schools of higher learning but excluding those that were State-chartered or under church control—to be approved by the State Department of Education, it became necessary to appoint someone peculiarly qualified to set standards of evaluation as a basis for actual approval of institutions of higher learning and to work intelligently and effectively with the administrations of these institutions. The appointment of a Supervisor of Teacher and Higher Education was made in August 1949.

DIVISION OF CERTIFICATION AND ACCREDITATION

CERTIFICATION

Table 66, on page 107, indicates the number of the various types of teachers', supervisors', and administrators' certificates issued by the State Superintendent in 1949-50. It is especially significant that it was necessary to issue more than twice as many War Emergency Degree Certificates for elementary school teaching in 1949-50 than during the preceding year.

On June 8, 1950, the State Board of Education upon recommendation of the State Superintendent, passed the following certi-

ficate regulations in addition to those already approved:

I. Certificate for Supervision of Special Education

Required of all supervisors of special education; valid for three years; renewable for four years and then for six-year periods upon evidence of successful experience and professional spirit.

Requirements:

- a. Completion of a four-year course in a standard college.
- b. One year of graduate work at a recognized university, chiefly in special education, including supervision and sufficient preparation in one of the areas of special education to qualify for a teacher's certificate in that area.
- b¹ Upon special request of a county superintendent the State Superintendent may issue such a certificate on a minimum of twelve semester hours of graduate work, chiefly in methods and supervision in the special field, with the provision that eighteen semester hours of additional graduate work, approved by the State Superintendent, shall be completed within five years.
- c. Four years of successful teaching experience, including at least two years in one of the areas of special education.
- II. Certificate for Supervision of School Lunch

Required of supervisors in school lunch; valid for three years; renewable for four years and then for six-year periods upon evidence of successful experience and professional spirit.

Requirements:

- a. Completion of a standard four-year college course.
- b. A year of graduate work at a recognized university, chiefly in methods and supervision, including methods and supervision in school lunch.
- b¹ In the college or graduate work the applicant must have included approximately forty-five semester hours of work in the special field. The forty-five semester hours of work in the field of school lunch must have included the following courses: foods, nutrition, food purchasing, food service equipment, food cost accounting, quantity cookery, supervision, curriculum development, child study, school lunch management, and supervision.
- c. Upon special request of a county superintendent, the State Superintendent may issue such a certificate on a minimum of twelve semester hours of graduate work, chiefly in methods and supervision, including methods and supervision in the special field, with the provision that eighteen semester hours of additional graduate work, approved by the State Superintendent, shall be completed within five years.
- d. Four school years (or the equivalent) of successful experience in food service management, including at least two years in a public school lunch program, or four years of successful experience as a teacher, including experience in management of the school lunch program.

III. Certificate for Supervisors and Directors in Areas not Otherwise Covered in the Certification Requirements

For a certificate as supervisor or director in an area not covered by other certificate regulations there shall be required a year of graduate work in Education and in the field of specialization. This certificate would cover the requirement for the following directors and supervisors now employed:

Supervisor of Commercial and Adult Education

Supervisor of Maintenance

Supervisor of Buildings Supervisor of Transportation Supervisor of Vocational Education

Director of Curriculum Director of Custodial Services

Director of Building Operation, Maintenance, and Purchasing

Director of Maintenance and Transportation

Assistant Superintendent in Charge of Supporting Services

Supervisor of Curriculum Development Supervisor of Audio-Visual Education

Director of School Health

Psychologist Psychiatrist

Director of School Planning

Supervisor of Industrial and Adult Education Supervisor of Construction

IV. Certificate for Speech and Hearing Therapist

Required of all speech and hearing therapists; valid for three years; renewable for four years and then for six-year periods upon evidence of successful experience and professional spirit and completion of a six-week summer term.

Requirements:

- a. Completion of a four-year course in a standard college with a major in speech.
- b. One year of graduate work at a recognized university, with emphasis on speech and hearing therapy. The main field should include speech pathology, anatomy, and physiology of the ear and vocal mechanics, audiology, lip reading, methods and materials in teaching speech, directed teaching in speech and hearing. It is suggested that the minor field be psychology and include some work in mental tests, counseling, and psychotography. and psychotherapy.
- Certificates for Speech Teachers in Elementary and High Schools General requirement same as for Bachelor of Science Special and High School Special Certificates.

Speech Content Requirement—30 semester hours.

Should include fundamentals of speech, voice and diction, public speaking, radio, pathology, phonetics, play production, teacher problems in speech, and allied courses in psychology and hearing.

VI. Certificate for Teacher of Driving

For certification in this field the applicant must qualify for some type of teacher's certificate and must have had satisfactory training for safe driving.

VII. Revision of Requirement for Junior High School Certificate

If an applicant wishes to qualify for teaching an individual subject in the junior high school, he must meet the same content requirements as obtain for the High School Teacher's Certificate and must present credit for special methods and practice teaching in the subject.

ACCREDITATION

Academic Schools

During the school year 1949-50, the members of the Accreditation Division visited every nonpublic academic school in the State at least once, except for one school which failed to submit the usual annual report. New schools were visited and certificates of approval issued as follows:

Type of School	Numb	er
Nursery School and Kindergarten		3
Kindergarten		$\frac{2}{2}$
Special		1

One nursery school and one kindergarten which had previously been approved were forced to close, in the one case because no building was available and in the other because the teacher took another position. The two schools returned their certificates of approval.

The State Board of Education revoked three certificates of approval issued to schools which ceased operations but failed to return their certificates. One of the institutions had moved to Virginia and the other two closed because teachers were not available.

Visits were paid to eight additional schools which for various reasons did not receive certificates of approval. Five were unable to obtain the services of teachers with a minimum of professional training. One was a church school, which did not wish approval and which is exempt from the requirements of the State law with regard to approval by the State Superintendent. One of the institutions which could not find qualified teachers decided to open as a nursery, but in compliance with a resolution of the State Board of Education refrained from using the word "school" in its name. Two other schools were on Federal Government property and were therefore not subject to the State law.

A new elementary school which had submitted fairly satisfactory plans failed, when it opened, to conform even approximately to the plans which had been approved by the Department. The State Superintendent was therefore unable to approve the institution and directed it to close.

Members of the Department, including two Supervisors of Elementary Schools, a Supervisor of High Schools, the Supervisor of Home Economics, the Supervisor of Colored Schools, the Supervisor of Curriculum Laboratory at Bowie, and the Director of Accreditation several times visited a settlement school for predelinquent girls from the District of Columbia, to determine whether the institution could be approved or could so modify its program as to justify approval. It was the consensus that no satisfactory program could be offered at the settlement school with the physical facilities and the staff which were available or which might become

available. At the request of the Director of Accreditation, two representatives of the Welfare Board in Washington met with members of the State Department of Education to discuss the situation. It was agreed that most of the girls might to advantage attend a nearby junior high school, if the necessary arrangements could be made. The County Board of Education agreed to the proposal and the results have been satisfactory.

Nonacademic Schools

During the school year 1949-50 certificates of approval were issued to various types of nonpublic nonacademic schools, and other certificates were canceled, as indicated in the following table:

Type of School or Curricula	Number of Issued	Certificates Canceled
Art	4	1
Beauty	—	3
Business	1	_
Correspondence	1	_
Dance		1
Flight	1	3
Music	3	7
Navigation		1
Photography		2
Speech	1	
Tailoring	1	_
Watchmaking	2	
Miscellaneous	2	_

One art school, two beauty schools, two flight schools, and four music schools, which closed during the year, have failed to return their certificates of approval or to consent to their revocation. When it has been possible to comply with certain legal requirements, these certificates will be revoked.

At the direction of the State Superintendent the Accreditation Division made careful resurveys of all the nonpublic trade and technical schools in Maryland, with the exception of certain longestablished schools, such as some of those which teach beauty culture, business, art, and music. In each case an expert in the particular field visited the school with one or more members of the Division. Specialists from other divisions of the State Department of Education, from local school board offices, from schools, colleges, and universities, from industry, and from the professions helped in the evaluations and offered suggestions for improvement.

The groups visiting the schools included the following types of persons:

A member of the local vocational division

A member of the Custom Tailoring Education Commission of New York City Members of the Vocational Division of the State Department of Education A specialist in photography from Johns Hopkins University A director from the Philadelphia Museum of Art

A director and a supervisor of art from local school systems

The dean of an art school

A teacher of art from a State Teachers College
Practicing commercial artists
A director of the Food Trades Vocational High School, New York City
Chairman of the Manhattan Trades Center, New York
The proprietor of a camera repair shop in Washington
Two members of the State Board of Examiners of Barbers
An assistant professor of electrical engineering and an assistant
professor of engineering at Johns Hopkins University
The vice-president of the Horological Institute of America

On the whole, the committees reported that the schools were doing adequate work, although, of course, in conversations at the schools and in reports filed with the State Superintendent suggestions for improvement were made. The State Superintendent gave each school a digest of the committee's report on the institution and the State supervisors have since worked with the schools to implement the various suggestions.

In the summer of 1949 and through the winter of 1950, the Director and members of the Division held a number of conferences with the proprietor of a specialty shop who wished to start a school of retailing. The Division used the advisory services of a local supervisor of distributive education and two members of the Division visited two such schools in New York City. Later in the negotiations a committee, consisting of the Dean of the School of Retailing at New York University, a professor of retailing from Drexel Institute, and representatives from several local department stores, drew up standards for schools of retailing. The specialty shop proprietor failed to submit plans which approximately conformed to these standards and therefore did not open a school of retailing.

In 1949-50 a small group applied for the approval of a prospective correspondence course in art. A committee consisting of the head of the Commercial Art Department at the Philadelphia Museum of Art, a commercial art teacher from the Maryland Institute, and a Baltimore commercial artist went over the course of study with members of the Division and recommended that the course be changed considerably. The two people concerned with starting the course have so far not pursued the matter further.

In September 1949, an additional assistant supervisor joined the Division to help supervise the nonpublic nonacademic schools. It was therefore possible to work more intensively with these schools than had previously been the case.

Institutions of Higher Learning

A deaconess training school applied for authority to issue a degree. A committee, consisting of a professor from Drew University, one from Union Theological Seminary, and the dean of McCoy College of Johns Hopkins University, visited the training school with members of the Division and recommended steps which the committee thought would be necessary before the school should be permitted to award degrees. The institution has not yet met these conditions.

During the school year 1949-50, the State Superintendent thought it desirable to have a small committee visit a specialized school of business, industry, and management which had been approved some years ago. A committee, consisting of the Dean of the College of Commerce of New York University and the Dean of the School of Business and Public Administration of Temple University, together with members of the Division, made a survey and suggested a number of desirable changes in organization and administration. A copy of the report was sent to the President of the institution. The Director of the Division and the Supervisor of Teacher and Higher Education plan to confer with the President of the institution from time to time relative to progress in the direction of the recommendations.

DIVISION OF LIBRARY EXTENSION

The establishment and improvement of library services for all the people of Maryland through public libraries, school libraries, and State institution libraries is the foremost concern of the Division of Library Extension. To this end the staff works throughout the State in consultation with librarians of the public, school, and institution libraries; public library trustees; school and institution officials; and organizations and individuals who are interested in developing, improving, and interpreting library services and materials. It aids in securing qualified professional personnel for all the libraries.

As a special activity the Division promoted understanding of use of bookmobiles in rural areas by conducting a three-month exhibit of bookmobile service in nine Maryland counties. The demonstration visit of one week in each county was planned by the staff with local library boards, Parent-Teacher Associations, Federated Women's clubs, Homemakers clubs, Boards of Education and other interested groups in each county. The bookmobiles with members of the Division staff made scheduled visits to communities, schools, and meetings of local organizations in each county. An estimated 2,000 adults and 25,000 children visited the bookmobiles. For many of them it was their first experience with bookmobile service. This project gained widespread interest and support for county-wide library service in these nine counties. Since the Garrett County weather does not permit bookmobile operation in the winter months, the library trustees of the Ruth Enlow Library rented their bookmobile to the State Department of Education for this project. Counties visited were: Allegany, Caroline, Charles, Dorchester, Frederick, Kent, Queen Anne's, St. Mary's, and Somerset.

The Division helped plan and participated in the programs of five county and regional book exhibits described in the section of this report headed "School Libraries," in a regional conference on bookmobile service at the Annapolis and Anne Arundel County Library where there were representatives from Anne Arundel, Harford, and Prince George's counties, and in a two-day conference of county library administrators in Annapolis.

As local libraries increase and the people realize the possibilities of library service, they request more materials on many more subjects than the libraries in the counties can collect. These materials are requested for loan through the Division of Library Extension which circulated 49,761 books, pamphlets, periodicals, and audiovisual aids this year. This is a 45 per cent increase over the circulation of the year ending June 30, 1949 and an increase of 122 per cent over 1948. Sixty-five per cent of these loans were made because of requests from the eleven county libraries. Thirty-two per cent of the items loaned were adult nonfiction of which one third was arranged for by interlibrary loans from the Enoch Pratt Free Library and other libraries in Maryland and other states.

Public Libraries

The Library Extension Division has been active both in promoting the establishment of new county libraries and in aiding in improving the services of county libraries established prior to this year in Anne Arundel, Baltimore, Cecil, Garrett, Harford, Howard, Prince George's, Queen Anne's, Talbot, Washington, and Wicomico counties.

Two significant achievements in the development of State-wide library service were the establishment of county library systems in Charles and St. Mary's counties in the spring of 1950. The formation of the St. Mary's County Memorial Library was due largely to the interest and generosity of Mrs. Howard C. Davidson who purchased and is restoring Tudor Hall, the historic Key house, and is presenting it to the county for a library. The Charles County Library was established by the County Commissioners with an appropriation of \$7,000, about a three cent tax, for the first year of operation. The formation of these two libraries brings to thirteen the number of counties which receive State aid for library service on a county-wide and tax-supported basis. Baltimore City also receives State aid for the Enoch Pratt Free Library.

In May the Montgomery County Council passed a law establishing a Montgomery County Department of Public Libraries which will operate without State aid. The Council took this action because of recommendations made by an eleven-member Library Advisory Committee which it had appointed early in November.

Another noteworthy achievement during the year was the organization of the Cecil County Friends of the Library, the first county-wide Friends of the Library Group to be organized in the State. This group, made up of interested citizens in the county, has been active in securing additional support for the library and in increasing interest in library services.

In the Spring of 1950 the Washington County Free Library began bookmobile service to rural communities and schools. In 1907 Washington County operated the first bookwagon in the United States and is credited with being the pioneer in this now generally accepted method of service. The new bookmobile began a service not offered in Washington County since 1940.

Pikesville has plans ready to build its war memorial library from funds collected from the citizens. This is a branch of the Baltimore County Library, which has also opened a much-enlarged branch in the center of Essex and another in the Arbutus-Halethorpe area.

Harford County Library has conducted a successful series of monthly discussions on various subjects. As a result of this interest, the local Grange provided the labor and funds for converting the library basement into an attractive auditorium for meetings and film showings. Incidentally, the Grange won the State prize for this project.

Queen Anne's County Free Library opened its first Negro branch at the Kennard School in Centreville, and the Wicomico County Free Library opened a Negro branch in Salisbury.

The Talbot County Free Library expanded its facilities by building an additional workroom and storage room.

Garrett County was without the services of a chief librarian during this year; in spite of this handicap, the library participated in the Oakland Centennial Celebration in the summer of 1949. The library board of trustees completed plans for the new Ruth Enlow Memorial Library building and construction was started in the spring of 1950. The Supervisor of County and Institution Libraries spent considerable time in conference with the acting librarian and the members of the board in planning the new building and in improving services.

The Enoch Pratt Free Library is working on plans for building three new branch libraries to be financed by a bond issue which was passed by the Baltimore voters.

The Bethesda Public Library Board of Trustees has chosen a site and is drawing plans for a library building which is being financed by the Library District.

The Chestertown Public Library Board has remodeled its building and added a very attractive children's room.

School Libraries

The school library program for 1949-50 continued to emphasize two major needs; the improving of library personnel and extending and enriching the services of the library in the school.

There was less emphasis on individual school visits by the Supervisor of School and Children's Libraries and more working with groups of librarians, teachers, and supervisors.

The school librarians in many counties gained in self-confidence and, at the same time, worked more co-operatively, both as individuals and as a group, with other teachers and the general supervisors.

Four significant developments of State-wide importance are:

1. Programs of in-service training for school librarians were expanded.

The first of a series of annual work conferences for selected school librarians from over the State was conducted by Mrs. Mary Peacock Douglas, recognized authority on school library service. Thirty school librarians attended the two-day conference which dealt with all aspects of the library as a service agency in the school. The program of the conference was built around suggestions made or questions asked by the participants.

One tangible outgrowth of the conference was the initiation of meetings of the librarians in each of several counties for the purpose of discussing their mutual problems and sharing ideas.

The conference was sponsored co-operatively by the Division of Instruction and the Division of Library Extension.

2. Increasing participation of school librarians in general workshops and a growing recognition of the contribution the library can make to the school program.

There were no library workshops, but librarians participated in most of the county workshops. This served the two-fold purpose of better acquainting the librarian with the curriculum and of enabling her to assist in the selection and use of materials.

3. Stimulation in selection and use of all types of materials through exhibits and programs planned co-operatively by county libraries and county Boards of Education.

Eleven county libraries and Boards of Education planned county or regional book exhibits for teachers, librarians, parents, and children. The purposes of these exhibits were to give teachers and librarians an opportunity to examine materials before selecting them for purchasing or borrowing, to discuss uses of the materials and common problems of teachers and librarians. The counties included were: Allegany, Caroline, Cecil, Dorchester, Kent, Queen Anne's, Somerset, Talbot, Washington, Wicomico, and Worcester.

4. Preparation of a new annual report form which will serve as a tool for principals and librarians to use in evaluating library service.

The report form was prepared by the Supervisor of School and Children's Libraries with the assistance of a group of school librarians and members of the staff of the Division of Instruction.

State Institution Libraries

Libraries in both hospitals and correctional institutions can play a vital part in rehabilitation, re-education, and recreation. The Division of Library Extension has the responsibility for stimulating library development in the State institutions by giving guidance in the organization and improvement of library facilities and services in each institution.

The tuberculosis hospitals under the State Department of Health continue to lead the way in library development with a two-year-old, active, library program under the direction of a professional librarian at the Victor Cullen Hospital and with a qualified librarian appointed at the Henryton Hospital in the fall of 1949. Under the direction of the librarian of the Victor Cullen Hospital, the library at Mt. Wilson Hospital is expanding its service with a patient in charge. Plans have been made for new library quarters and a qualified staff at both Mt. Wilson and the tuberculosis building of the Baltimore City Hospital when new buildings are completed. The continued interest of the Maryland Tuberculosis Association in urging library quarters in the new buildings and their financial assistance in the purchase of books for all established libraries is a great boon to successful library development.

As a result of frequent conferences with members of the State Departments and institutional staffs and of surveys of existing library conditions, specific recommendations for improved library services were made to the Department of Correction, the Division of Juvenile Training Schools of the Department of Public Welfare, and the Department of Mental Hygiene. Facilities for library service are inadequate in these institutions and because of lack of both books and staff this area of service is almost totally undeveloped. As a result of recommendations made by the Supervisor of County and Institution Libraries, progress was made in library development at the Maryland House of Correction which set up an annual budget for the purchase of books, reorganized its present library, and surveyed inmate reading interest as an aid to selection of material. A survey made three months after the initial group of new books had been put into circulation showed such a marked increase in use of books, particularly the new books, that a similar project was undertaken at the Maryland State Reformatory for Males, where seven hundred and fifty dollars was spent in 1950 for new books.

The library at Boys' Village opened in December 1949 under the direction of a member of the education staff with three student assistants. Meetings were held with the superintendent and department heads of Boys' Village to discuss ways to make the library effective in each part of the school program.

All of the State juvenile training schools borrowed extensively from the book collection of the Division of Library Extension and special guidance was given in selection of suitable materials and in suggestions for their use.

Visits were made to the mental hospitals at Springfield, Spring Grove, and Crownsville. Conferences were held with staff members interested in a library, but it seems likely that no definite library development will be undertaken until after the new commissioner of Mental Hygiene has taken office. There is a need in all State institutions for a substantial increase in up-to-date library materials selected to meet the particular needs of the institution and for capable personnel to carry out an adequate library program.

State-wide Interest

Increased interest in library service is State-wide. Some of the organizations which are promoting improved libraries as a part of their State programs are: American Association of University Women, American Legion, American Legion Auxiliary, Business and Professional Women's Club, Junior Chamber of Commerce, Kiwanis Club, League of Women Voters, Lions Club, Maryland Congress of Colored Parents and Teachers, Maryland Congress of Parents and Teachers, Maryland Council of Homemakers Clubs, Maryland Educational Association, Maryland Farm Bureau, Maryland Farm Bureau Associated Women, Maryland Federation of Women's Clubs, Maryland Library Association, Maryland State Grange, Maryland State Teachers Association, Maryland Tuberculosis Association, Optimist Club, Rotary Club, Senior 4-H Club Council, Soroptimist Club, local civic and improvement associations, and many other groups.

DIVISION OF VOCATIONAL EDUCATION

One of the most important developments in the field of vocational education during the past year was the institution of a new supervisory technique which was employed to survey county school systems. This new survey method utilized a complete "team" of vocational supervisors from the State office. Following the school visitations, a detailed report was written by the supervisors in each area and a complete report was sent to the county by the State Director of Vocational Education.

Vocational education offers the student courses in such diversified fields as agriculture, the mechanic arts, and home economics. Vocational education services not only provide the student with a basic introduction to his chosen vocation, but also serve as a practical and functional type of vocational guidance, since the student may gain experience and knowledge in a wide range of vocational fields.

Agricultural Education

In the past year, vocational agriculture courses have been receiving increasing emphasis in the schools and colleges of Maryland. Many counties, during the transition to a twelve-grade school system, took that opportunity to expand their existing agricultural education facilities. The result has been that agriculture has shared quite well in the public school building program in Maryland. And in the summer sessions of 1949 and 1950, the University of Maryland offered courses in farm management especially designed to meet the needs of vocational agriculture teachertraining.

The work of the Future Farmers of America and the New Farmers of America improved steadily throughout the past year. Seven officer-leadership training schools were held across the State which were accessible to all F. F. A. and N. F. A. officers. At the 1950 F. F. A. Convention in Kansas City 37 Maryland boys were in attendance; in 1946 there were but two.

One problem that received a considerable amount of attention during the past year is the matter of school farms and land laboratories. While not recognized as a necessity in all situations, it is felt that many vocational agriculture programs can be materially improved by use of school farms and land laboratories.

Two state-wide agriculture conferences were held. The annual summer conference of vocational agriculture teachers met in Garrett County. In addition, seven area and nine county conferences were held during the year.

The usual summer conference for colored vocational agriculture teachers met at Bowie in August. Two one-day conferences also were held for the entire group during the year.

Trade and Industrial Education

The trade and industrial education program for the year 1949-50 shows considerable improvement in plant facilities and the quality of instruction. The offerings in the evening trade extension classes have increased, as well as the offerings in the veterans training programs. There was also noticeable increase in the training for apprentices and this increase was not confined to veterans' training.

The improvement of teacher-training services received major emphasis during the past year. Programs for in-service training for teachers as well as pre-service and graduate courses were conducted by the University of Maryland. The current trend is toward expanded services in the in-service and graduate level categories in industrial education. The year 1949-50 has seen increased need and opportunities that should eventually result in university level educational and training services to industry as well as to public schools.

In addition, the vocational education department, through a series of conferences with staff members, local supervisors, principals, and teachers has considered such topics as administrative practices, articulation between sending and receiving schools, the development of new courses of study, and the self-appraisal of programs on pre-vocational and vocational levels. The State Director and his staff have worked with local administrators, supervisors, principals, and lay groups in implementing plans in accordance with State policy and community needs.

Through co-operative relations with employers, public school departments, and co-operating agencies, the vocational industrial education department has increased the over-all effectiveness of its program and obtained support on many matters giving material assistance to vocational education. Under the school building programs, industrial education has been able to bring its educational facilities to a high level of modernization. Through direct purchases and the acquisition of equipment through donable properties procedures, the department has been able to obtain types of equipment that were impossible to acquire in previous years.

Home Economics Education

Considerable time during this past year was given to the development of curriculum materials and organization. Through the medium of teachers' committees, which were formed in many counties, much interest has been created and some progress made in adapting approved teaching methods and materials to actual classroom situations.

There has been a large program of school building, including new departments for home economics, in most of the counties of the State. State and county supervisors have devoted considerable time and thought to helping plan the layout and equipment of new buildings and in redesigning some old ones. The State Supervisor of Home Economics acted as State adviser for the New Homemakers of America (for colored girls) and an active program was carried out throughout the year. Every home economics department now has a chapter of N. H. A. A reorganization of the State Advisory Committee is in progress, and it is designed to increase the number of advisers from six to twelve; it will thus spread the interest and information of N. H. A. among the advisers. A delegation of six State officers was sent to the National Convention in Louisiana in June.

There has been an increased enrollment in teacher training in both the white and colored institutions in the State, resulting in a greater number of qualified teachers becoming available in the spring of 1950. This increase in the supply of teachers was probably due to a recruitment program and to the increased salary schedule.

Distributive Education

The past year witnessed a continuation of growth and progress in the establishment and improvement of distributive education courses in the schools of the State. The program advanced in terms of both scope and effectiveness. On the adult training level, employers generally appeared to be more amenable to training, and firms which had sponsored training programs in the past expanded their activities and placed more employees in one of the distributive education programs.

Distributive education courses are now offered by one or more high schools in Baltimore City, and Allegany, Montgomery, and Washington Counties. A few schools have classes in retail selling and office training as a part of the commercial program.

A marked increase in both attendance and interest was evidenced in the distributive education courses offered in Baltimore City during 1949-50. Total enrollments in the courses jumped from 2,320 students in 1948-49 to 3,455 students. Fifty-three more distributive education classes were offered, and fifteen more co-operating employers consented to aid in the training program.

DIVISION OF VOCATIONAL REHABILITATION

During the year 1949-50 the Division of Vocational Rehabilitation continued to broaden the scope of services rendered to disabled citizens of the State and to prepare for and place in satisfactory employment a larger number of these persons than in any previous year, the total being in excess of 800.

The most significant advance was in the direction of providing more adequate services for some of the severely disabled, principally through the facilities of the Woodrow Wilson Rehabilitation Center. at Fishersville, Virginia. In 1947 the State of Virginia obtained from the Federal Government the ownership of the Woodrow Wilson Army General Hospital. This hospital, located at Fishersville, midway between Staunton and Waynesboro, Virginia, was constructed during World War II. A part of this huge plant was taken over by the Virginia Division of Vocational Rehabilitation and transformed into one of the most modern and complete rehabilitation centers in the United States, with facilities to care for 400 per-At the Center it is possible to provide complete rehabilitation services, with the exception of hospitalization and surgery, for clients who are so severely disabled as to render infeasible the ordinary methods of rehabilitation. A complete medical section under the direction of a qualified doctor of physical medicine provides restoration services through physical therapy, occupational therapy, the fitting of prosthetic appliances and training in their use, diet regulation, and other means. A competent guidance staff is maintained to assist clients in choosing vocations in keeping with their physical and mental capacities. Training courses have been established in more than fifteen trades; such as, watch repair, sewing, beauty culture, printing, weaving, and shoe repair. Additional training courses are available in the Western Virginia Regional Technical School, which occupies another section of the post.

While the Center is open to all disabled persons who can benefit from physical restoration or training, it is particularly adapted to the needs of the severely disabled; paraplegics, double amputees, spastics, and those suffering from such a debilitating condition as multiple sclerosis. The construction of the plant, with all buildings at one level and connected by covered corridors, is ideal for wheel-chair cases, of which there is always a great number in attendance.

Dormitories are provided for those who are able to live in them. For those who require more privacy, single or double rooms are available. The living quarters are well supervised by a house father, house mother, and their staffs. Ample recreation facilities are provided, and the students participate actively in the direction of their own programs.

Since it would not be practicable for each state having a relatively small population to maintain such a center for its own rehabilitation clients, the Woodrow Wilson Center has been opened to clients from neighboring states since early in 1948. During the past

year Maryland took advantage of this opportunity and maintained between twelve and fifteen students in the process of physical restoration or training, or both, at the Center at all times. While the majority of these programs are still in progress, five Maryland rehabilitation clients have completed their training at the Center and have returned home, where they have been placed in remunerative employment.

The Woodrow Wilson Rehabilitation Center fills a need that has been evident for many years, and it is expected that the Division of Vocational Rehabilitation will make increasing use of these facilities. The next concern is with those clients who are too severely disabled even to attend a rehabilitation center. Provision must be made for preparing them to lead useful lives even though they are confined to their homes or otherwise incapable of participating in any of the existing programs.

During 1949-50 also, improvements were made upon the already excellent plan of co-operation between the Division and the Maryland State Employment Service. An employment counselor from the M. S. E. S. staff was assigned regularly to the Division to assist counselors in placing disabled persons in industry. This plan has been extremely successful since it places at the command of each rehabilitation counselor the complete resources of the Employment Service with its supply of information on job openings and employment conditions.

The past year also witnessed a step forward in another direction. The professional standing of Vocational Rehabilitation within the State has been greatly enhanced by the organization of the Maryland Chapter of the National Rehabilitation Association. The N. R. A. was organized more than twenty years ago to further the cause of Vocational Rehabilitation throughout the country. It has been active in developing rehabilitation methods and techniques, in providing a forum for the expression of opinion by all who are interested in the welfare of the handicapped, and in assisting in the preparation of legislation in behalf of disabled persons. With the organization of the Maryland Chapter it is felt that there will be a corresponding unification and concentration within the State of the efforts of all those who are interested in the problems of the disabled. A gratifying number of co-operating agencies and individuals throughout the State have shown an interest in the new organization and are participating actively in its direction.

Action on Case Load

Of the 5,512 disabled persons on the live roll, 3,330 were on the roll at the beginning of the year and the other 2,182 were new cases. During the year 3,562 persons actually received service.

The "new" cases were reported by 34 different agencies from all 23 counties and Baltimore City. Hospital clinics led the list

with 263, while public welfare agencies came next, with 241, followed by tuberculosis sanatoria and associations, with 182.

Purchase of Services

Rehabilitation funds were used to purchase 3,119 services. At least 2,069 additional services were rendered with funds contributed by other agencies or by the disabled clients themselves.

Of the total of 818 persons rehabilitated, 357 lived in Baltimore City and 461 in the counties. Among the group were 52 blind persons and 90 persons who had previously had tuberculosis. The 818 rehabilitated persons are now earning at the rate of \$1,336,071.72 a year, and are supporting not only themselves but, in addition, 1,004 dependents.

Expenditures

Expenditures for the year, amounting to \$372,453.74, consisted of appropriations of \$225,140.59 from Federal funds and \$147,313.15 from State funds. The increase in State funds expended over the previous year amounted to over 40.7 per cent.

These funds were expended as follows:

Administration	\$20,847.32
Guidance and Supervision	148,627.37
Case Services	202,979.05

^{*} Number of white graduates for 1946-47, as shown on TABLES 24 and 25 is not in agreement with number given on TABLE 26. TABLES 24 and 25 include the '46 summer school graduates of Montgomery County while TABLE 26 excludes these and includes the '47 summer school graduates instead. This was necessary because of a change in method of reporting summer school graduates.

† Includes two boys who received diplomas after June 1948 and were not reported previously.
